of your patients*

Blom-Singer® *Rapid Response* SPECIAL ORDER VOICE PROSTHESES SERVICE

Affordable Voice Prostheses That Meet the Special Needs of Your Patients!

People are different, and a standard voice prosthesis may not be right for everyone. That's why we've introduced the new **Rapid Response Special Order Voice Prostheses Service**. Now you can order from a wide range of specially designed products.

Now Available!

- ✓ **Special Length:**
Available in one millimetre incremental lengths for comfort and a more precise TO puncture fit.
- ✓ **Large Oesophageal Flange:**
Provides a "seal" to help manage leakage around a voice prosthesis. Also, enables a safe and convenient downsizing from a wider diameter prosthesis to a smaller diameter.

Effectiveness is dependent on an optimal prosthesis length fit that achieves a snug flange-to-flange seal against the wall surface(s).

- ✓ **Large Oesophageal & Tracheal Flanges:**
Provides a "double seal" in patients with significantly enlarged puncture tracts and "tear-drop" or irregularly shaped punctures.

Effectiveness is dependent on an optimal prosthesis length fit that achieves a snug flange-to-flange seal against the wall surface(s).

- ✓ **Increased Resistance:**
A voice prosthesis with a valve that opens less easily. Designed to be used in patients in whom conventional voice prostheses open intermittently with fluctuations in oesophageal pressures resulting in air ingestion and/or leakage.

- ✓ **TOP Occluder:**
Voice Prosthesis with its valve permanently sealed closed. (coming soon)

SPECIAL LENGTH

Special Length

	5mm	7mm	9mm	11mm	13mm	25mm
